Shehryar Ahmed

Karachi, Pakistan • linkedin.com/in/shehryar26/• shehryarahmed268@gmail.com

With over 6+ years of experience, I am a versatile Senior Full Stack Developer specializing in both frontend and backend technologies. My expertise spans **React**, and **(MongoDB, Express, React Native, Node.js),** providing endto-end solutions for scalable web applications. I have led multiple projects from the ground up, implementing efficient, modular architectures that prioritize performance, scalability, and security. I excel in creating intuitive, responsive UIs with React, building robust backend systems with Node.js, Laravel, and integrating cloud services to ensure high availability and maintainability.

Experience

MARCH 2023 – PRESENT | Systems Limited | Karachi, Pakistan

- **Led the development of a high-performance**, scalable QR code generation system using React, React Native, Node.js, and Express, allowing the creation of thousands of QR codes in under a minute**.**
- **Developed a dynamic and responsive** front-end interface with React enabling users to easily generate bulk QR codes and view them in real time. Leveraged modern design systems, reusable components, and state management with Redux to store and handle QR code data efficiently.
- **Built modular backend services** with **Node.js**, and **MongoDB**, optimizing data handling and API performance under high-traffic conditions.
- **Integrated real-time** features like live updates and notifications using Socket.io and WebSockets to keep users informed of their QR code generation status as it happens, providing an interactive experience.
- **Integrated third-party APIs and cloud services** (AWS, Firebase, and Azure), including authentication (JWT, OAuth), push notifications, and file storage.
- **Designed and deployed CI/CD pipelines** using **GitHub Actions** and **Docker**, automating builds, testing, and deployments for faster release cycles.
- **Ensured high-quality code** through unit and integration testing with **Jest**, **Mocha**, and **Chai**, maintaining over 90% test coverage.
- **Optimized frontend performance**, implementing lazy loading, code splitting, and server-side rendering (SSR) with **Next.js**, improving SEO and load times.
- **Collaborated with cross-functional teams** to define project requirements, manage sprints, and deliver robust solutions on time using **Agile methodologies**.
- **Mentored junior developers** on best practices in **React**, **React Native**, **Node.js**, and **Laravel**, promoting clean code and scalable architecture patterns.

DECEMBER 2021 – FEBUARY 2023 | 10Pearl | Karachi, Pakistan

- **Developed dynamic, high-performance web and mobile applications** using **React**, **React Native**, and **Node.js**, seamlessly connecting frontend and backend services to optimize user interactions and data management.
- **Designed and implemented a real-time transaction system** using **React** and **Node.js**, capable of processing over **10,000 transactions per second** with minimal latency, ensuring secure and reliable data flows.

- **Built and maintained custom RESTful APIs** with **Express.js** and **MongoDB**, delivering robust backend services for payment gateways and third-party integrations.
- **Implemented OAuth2 and JWT authentication** to secure communication between internal systems and external APIs, safeguarding sensitive financial and user data.
- **Leveraged Laravel (PHP)** for developing advanced features in enterprise applications, including payment processor and CRM integrations.
- **Created modular, reusable UI components** with **React** and **React Native**, focusing on performance and responsiveness—resulting in a **30% boost in user engagement**.
- **Configured CI/CD pipelines** using **GitLab CI** and **Docker**, automating build, testing, and deployment processes, reducing manual intervention by **80%**.
- **Architected scalable backend systems** deployed on **AWS ECS** and **Kubernetes**, supporting auto-scaling and achieving **zero-downtime deployments** for mission-critical apps.
- **Integrated cloud services** such as **AWS Lambda**, **S3**, **CloudFront**, and **RDS** for serverless processing, content delivery, and database management, enhancing scalability and reducing infrastructure costs.
- **Mentored and led a team of junior developers** in **React**, **React Native**, **Node.js**, and **Laravel**, enhancing their technical proficiency and fostering a high-performance team culture.

MAY 2018 – OCTOBER 2021 | Folio3 | Karachi, Pakistan

- **Contributed to the development of a full-stack MERN web platform** (MongoDB, Express, React, Node.js) as part of a capstone project, delivering a scalable, performance-driven solution focused on user experience and responsiveness.
- **Built dynamic and responsive user interfaces** using **Angular**, leveraging data binding, reusable components, and modular architecture to enhance UI performance and maintainability.
- **Designed and integrated custom RESTful APIs** with **Node.js** and **Express**, connected to a **PostgreSQL** database for efficient data management and optimized server-side performance.
- **Implemented real-time data pipelines** using **Apache Kafka**, enabling seamless data streaming for analytics dashboards and significantly reducing latency in data flow.
- **Explored backend development using Java,** implementing user authentication, data validation, and API endpoints for side projects and internship applications.
- **Utilized Docker** to containerize applications and deployed experimental builds to **AWS ECS**, focusing on costeffective, lightweight deployment workflows.
- **Assisted in configuring CI/CD pipelines** with **Jenkins** and **Helm**, streamlining testing and deployment processes during collaborative development sprints.
- **Applied core security principles** by implementing encryption, sanitization, and validation mechanisms to protect API endpoints and safeguard user information.

Education

AUG 2014 – OCT 2018

NED University, Karachi, Pakistan

- **Bachelor of Science** in Computer Science

Skills

Frontend Development

- Built **dynamic, responsive, and high-performance user interfaces** using **React**, **Angular**, and **Vue.js**, delivering seamless user experiences across devices.
- Wrote **clean, modular, and maintainable** code in **JavaScript** and **TypeScript**, leveraging **ES6+** features and modern design patterns for scalable frontend development.
- Developed **scalable layouts** using **HTML5**, **CSS3**, **SASS**, **Flexbox**, **Grid**, and **Bootstrap**, ensuring cross-browser and cross-device compatibility.

Backend Development

- Built **scalable backend services** using **Node.js**, **Express**, **MongoDB**, and **Laravel (PHP)**, optimizing performance under heavy traffic conditions.
- Designed and implemented **RESTful APIs** with **Node.js (Express)** and **Laravel**, integrating third-party services for complex business operations and transactions.
- Developed **enterprise-grade backend features** in **Laravel**, including **authentication**, **data validation**, and **custom CMS integrations**.

Databases & Data Management

- Worked extensively with **MongoDB** and **PostgreSQL**, designing efficient schemas and optimizing queries for high-performance data access.
- Managed **relational databases** using **MySQL** and **MariaDB**, ensuring data integrity and scalability.
- Utilized **Redis** for caching and session management, improving system responsiveness and throughput.

Cloud & DevOps

- Deployed and managed applications on **AWS** using **ECS**, **Lambda**, **Fargate**, **RDS**, **S3**, **EKS**, and **CloudWatch**.
- Containerized services using **Docker** and orchestrated deployments via **Kubernetes**, achieving high availability and zero downtime.
- Automated **CI/CD pipelines** with **Jenkins**, **GitHub Actions**, and **GitLab CI**, reducing deployment time and enhancing release reliability.

API Development & Integration

- Developed and consumed **RESTful APIs** using **Node.js**, **Express**, and **Laravel**, ensuring efficient front-end to back-end communication.
- Implemented **GraphQL** for flexible data querying and reduced payload sizes, improving overall application performance.
- Secured API endpoints using **OAuth2** and **JWT**, maintaining safe and authenticated access to sensitive data.
